Mio™

Trusted, Rugged Enterprise Tablet Validated and Approved by Google

The MioWORK™ L1000 Series has been certified as an Android Enterprise Recommended (AER) rugged tablet, a Google-led global initiative that lists devices and services best equipped for professional use. It means that the L1000 Series has been Google-validated to deliver a powerful package of security and management capabilities, and provides the longevity required by businesses.

android enterprise recommended

Built to Rugged & Robust Security

AER devices have to pass a rigorous testing process conducted by Google to ensure that they meet strict enterprise-level requirements. This process is both hardware and software focused and covers a variety of criteria including performance, toughness, consistency and security, so that businesses can deploy the AER-certified MioWORK™ L1000 with confidence backed by Google.

AER – Rugged		MioWORK™ L1000
Android 7.0+	✓	Android 9.0 / Android 10.0 (coming soon)
